This GRP has been developed based on express assumptions provided by and under the direction and supervision of the Washington Department of Ecology (WDOE) and may not be appropriate for all conditions. There may be situations different from those assumed by the WDOE and on which this GRP is based. Responders must carefully consider actual conditions and use common sense and caution when determining how to most effectively respond to a spill and any resulting circumstances. Actual response actions that vary from this GRP are at the sole risk and responsibility of the responders. TRP does not assume the risk and responsibility for the implementation and actual use of the GRP, or for the assumptions given to TRP to prepare this GRP.
